Education

Lovely Professional University

Bachelor of Technology in Computer Science

Aug 2022 - May 2026

GPA: 7.78 / 10.00

Govt. Co-ed Sr. Sec. School

Apr 2021 - Jun 2022

Intermediate (CBSE board)

Percentage: 91%

SD Public School

Apr 2019 - Mar 2020

Matriculation (CBSE board)

Percentage: 92%

Projects

Burger House Website | HTML, Javascript, CSS, ScrollReveal | GitHub | Website

- Developed a RADAR-based distance measuring system capable of detecting objects within range. The system provides audible feedback via a buzzer and displays the approximate distance to the object, offering real-time alerts and measurements

N Queen Visualiser | HTML, CSS, JavaScript, Backtracking Algorithm | GitHub | Website

- Developed an interactive N-Queen Visualizer using JavaScript to solve the N-Queen problem, showcasing the backtracking algorithm in real-time. The project visualizes the placement of queens on an NxN chessboard, highlighting valid and invalid moves.
- Designed a responsive user interface allowing dynamic input for board size (N) and implemented intuitive features such as step-by-step visualization, highlighting queen conflicts, and board resets, enhancing user engagement and understanding of the algorithm.

Article Summarizer | React, Flask, Axios, Natural Language Processing (NLP) | GitHub

- Developed an article summarization tool leveraging NLP techniques to extract key information from lengthy articles, providing concise and coherent summaries that maintain the core message.
- Built a responsive and intuitive front-end using React, enabling users to input URLs or text directly for summarization, with seamless real-time feedback and summary generation.

Sorting Visualizer | Data Structures and Algorithms, JavaScript, HTML, CSS | GitHub | Website

- Created an interactive sorting visualizer to demonstrate algorithms like Quick Sort, Merge Sort, and Bubble Sort.
- It provides real-time visual feedback, helping users understand algorithm performance and complexity.

Skills

Languages: C/C++, Java, JavaScript, Python, PHP, R

Tech Skills: Data Structures and Algorithms, Game Development, Web Development

Coursework: Operating Systems, Software Engineering, OOP, Database Management

Technologies: GitHub, Jupyter Notebook, React.js, Blender, MongoDB, Tableau, Excel

Key Competencies: Analytical Thinker, Team Player, Adaptive Learning, Leadership, Effective Communication

Certifications

Generative AI | Coursera | 2024

Design and Analysis of Algorithms | Coursera | 2024

Excel Skills for Business Specialization | Coursera | 2024

R Programming | Coursera | 2024

Complete Interview Preparation | GeeksforGeeks | 2024

Achievements

Volunteer, Humana People to People (NGO): Raised awareness about essential documentation (e.g., Aadhar cards) and provided educational support in underprivileged communities.

250+ problems solved, earned 5+ badges on LeetCode
